Summary

I am an experienced DEV with a proven track record of working in the computer software industry. I specialize in designing and building complex systems and am an expert in Typescript/JS. I am versatile and productive, with the ability to adapt quickly to new technologies and work efficiently under pressure. Overall, I believe I am a valuable asset to any software development team.

Experience

Senior Frontend Developer

FUEL

Aug 2022 - Apr 2023 (9 months)

As a frontend developer working in FUEL, I have gained valuable knowledge in creating modern and fast solutions that cater to the needs of both creators and users. I have worked on projects such as Turkish Flava's Atlantis website, The Lenaverse website, and Helix Records' NFT website, which have allowed me to showcase my ability to create visually appealing and user-friendly websites that cater to the unique needs of each client.

Frontend Web3 Developer

SpiritSwap

Nov 2021 - Aug 2022 (10 months)

Designed and developed a cutting-edge financial application from scratch, utilizing advanced programming languages and technologies to achieve high performance and user satisfaction. Check it out at <https://spiritswap.finance>

Software Engineer

Clevartech

Jun 2021 - May 2022 (1 year)

At Clevartech, I expertly develop and implement innovative and responsive full-stack solutions for diverse clients in the USA. My proficiency in front-end and back-end technologies enables me to deliver modern and fast solutions that exceed customer expectations.

Full Stack Developer

Kubikware

Oct 2018 - Jun 2021 (2 years 9 months)

As a full stack web developer at Kubikware, I successfully initiated and completed numerous projects using React and Nextjs from scratch. Additionally, I created landings with React and Next using Atomic Design design system, which resulted in an efficient and user-friendly website experience. My

experience in these technologies has honed my ability to develop high-quality web applications that meet client needs.

Education

ISIV

SR System Analyst, Full Stack Web Developer

2015 - 2018

Digital House

Full Stack Web Developer

2017 - 2017
